we ordered a vegan kebab and vegan burger that were quite delicious! the vegan kebab meat substitute really shocks, but was good not. edit: we also tried their vegan [pizza](#), which I was really good. was happy to see that it had vegan cheese. updated by previous review on 2022-07-01 [read more](#). What [User](#) doesn't like about Parrilla: I ordered a thin [pizza](#) with lamp and vegetables (pepper, jalapeño, wobble, tomaten). it was delicious, crispy, hot, well filled with cheese and delicious. the only thing I could not feel was the lamp taste, but the taste of all the others was obvious and has a rich taste especially the jalapeño. the personal was helpful. the restaurant was modest and cozy. Surely, it's also a nice event to feel like in the *Wild West* once, to drink and sample like the cowboys or even the bandits with a beverage or two paired with onion rings and a nice juicy burger, and you can try fine American menus like **Burger or Barbecue**.
